

DIGITAL KNOWLEDGE CENTER

The Digital Knowledge Center (<https://dkc.umw.edu>) (DKC) empowers UMW students to be digital creators by providing the support, technology, and spaces to complete digital projects, including audio, video, graphic design, 3D modeling, and website projects.

The DKC:

- helps students learn the tools of digital creation through one-on-one peer consultations, classroom presentations, and online guides
- provides the technology for digital creation through media equipment loan at the HCC Info Desk, design software, 3D printers, and tools in the DKC workspace, and web-building platforms such as Domain of One's Own
- operates spaces for digital creation, including the HCC Video Production Studio, DKC Podcast Studio, HCC Vocal Booth, and DKC Workspace

UMW students can find out more and book appointments with the DKC at dkc.umw.edu.
